

## Embedded Linux Seminar

The seminar features speakers from various organizations in Hong Kong and aims to provide attendees with a comprehensive overview of the current state of the Embedded Linux Marketplace. Information will be provided on the incumbent players & their relative size to one another. The Embedded Linux market will also be characterized in terms of both size and trends. Common deployment scenarios will be identified and discussed in terms of their popularity, strengths and weaknesses.

For the more technically-minded information will be provided on the price, availability and ease-of-use of various tools and SDK available at the moment. Information will be provided at sufficient detail to satisfy the information requirements of both senior decision makers and high level technical staff.

To register, please fill in the below form for online registration or send an email to enquiry@swpearl.com. For further information, please contact us at 2206-9011.

Register Now! Seats are limited.
